

Memorandum

Date: October 18, 2024

To: All AHS and Contracted Service Providers of Continuing Care Homes

From: James Silvius – Senior Medical Director, Provincial Seniors Health & Continuing Care
Robyn Maddox – Senior Provincial Director, Provincial Seniors Health & Continuing Care

RE: Outbreak Incremental Cost Funding/Supplement - Update

Effective October 1, 2024, Continuing Care Home operators, including Type A (formerly long term care), Type B (formerly DSL3, DSL4, DSL4-D and personal care homes), Type C (hospice), and post-acute (e.g., restorative care and transition beds funded as continuing care homes), who are directed to follow practices in the Guide for Outbreak Prevention and Control in Continuing Care Homes will be eligible for the outbreak incremental cost supplement. This replaces the Outbreak Incremental Cost Funding Business Process released July 1, 2023.

The Outbreak Incremental Cost Supplement – Business Practice Resource is provided to support all Continuing Care Home operators to understand the process to receive the outbreak per diem funding. The resource provides information on qualification for the supplement and an example of the funding calculation.

Please review webpage(s), resources and/or shared document storage to ensure the rescinded Outbreak Incremental Cost Funding Business Process and related documents, as applicable, are removed from your resource lists and replaced with the revised resource.

For any further questions please contact continuingcare@ahs.ca.
